Quiz 1

(September 20th @ 5:30 pm)

PROBLEM 1 (40 pts)
• The following is the timing diagram of a logic circuit with three inputs. Simplify the Boolean expression of the circuit and sketch the minimized circuit.

\[
\begin{align*}
\text{a} & \\
\text{b} & \\
\text{c} & \\
\text{f} &
\end{align*}
\]

PROBLEM 2 (30 pts)
• Complete the timing diagram of the logic circuit whose VHDL description is shown below:

```vhdl
library ieee;
use ieee.std_logic_1164.all;

entity test is
  port ( a, b, c: in std_logic;
         f: out std_logic);
end test;

architecture struct of test is
  signal y: std_logic;
begin
  y <= not(a) xor c;
  f <= y xnor b;
end struct;
```

PROBLEM 3 (30 pts)
• Complete the timing diagram of the digital circuit shown below. You must consider the propagation delays. Assume the propagation delay of every gate is 5 ns. The initial values of all signals are plotted in the figure.

\[
\begin{align*}
\text{a} & \\
\text{na} & \\
\text{f} &
\end{align*}
\]
